

GoToMyPC[®]

CORPORATE

PRODUCT OVERVIEW

Citrix GoToMyPC Corporate

Citrix[®] GoToMyPC[®] Corporate is the simplest, most cost-effective solution for secure remote access to the desktop. Shrinking budgets and mounting competitive pressures require your business to be more productive with fewer resources. GoToMyPC Corporate reduces the costs and complexity associated with other remote-access solutions; it offers the highest levels of security and control; and it immediately increases employees' productivity.

Citrix GoToMyPC Corporate delivers a fully managed solution with minimal deployment expenses.

Citrix GoToMyPC Corporate will help your organization:

- Avoid costly infrastructure changes and lengthy implementations
- Experience quick, seamless deployment
- Improve end-user remote-access experience
- Increase employee productivity while reducing remote-access costs

“A CIO who wants to forgo all the hassles involved with VPNs and even their SSL alternatives can also consider screen-sharing technology such as GoToMyPC Corporate.”

— CIO Magazine

GoToMyPC Corporate uses advanced Web-based screen-sharing technology that works with your existing security, network and configuration and your existing Internet infrastructure. It enables your end users to get secure, encrypted remote access to their desktops from any Internet-connected computer or Windows® Mobile, Pocket PC or Windows® CE wireless device. There's no need for IT staff to change or open ports, configure IP addresses or deploy any extra hardware or software.

MOST COST-EFFECTIVE SOLUTION

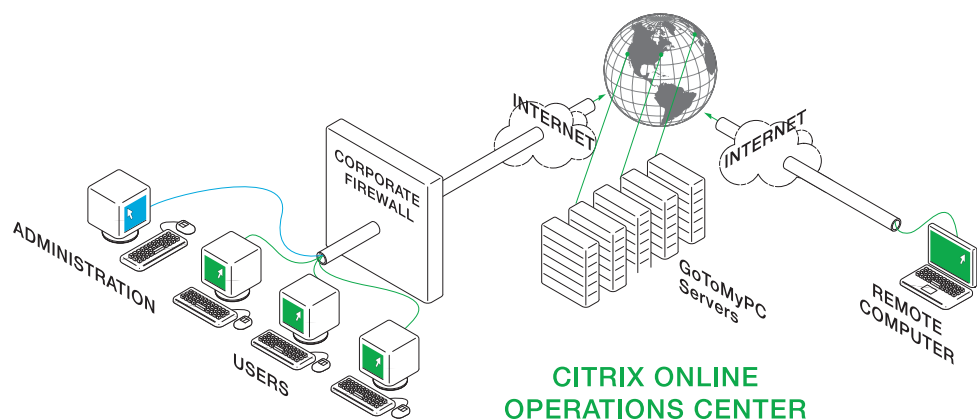

GoToMyPC Corporate reduces the costs and complexities associated with other remote-access solutions. Your total cost of implementation (TCI) is minimal because there's no investment in hardware, software or integration and no changes to servers, systems or security infrastructure. Implementation is quick, and your costs remain low because there is no maintenance required, no upgrades to manage and little, if any, end-user support needed. GoToMyPC Corporate offers a low TCI and recurring cost structure, enabling your organization to expand its remote-access community without increasing overall costs.

SIMPLEST SOLUTION ON THE MARKET

GoToMyPC Corporate is easy for end users to learn and simple for IT to deploy, configure, control and support. It provides access to the entire desktop — no client installation is required, and there's no need to Web-enable legacy applications.

MULTI-LEVEL SECURITY AND CONTROL

All GoToMyPC Corporate servers are located in highly secure data centers and audited by Cybertrust™. All data is highly compressed and protected with end-to-end 128-bit Advanced Encryption Standard (AES) encryption. Multiple password and authentication methods are required. Feature-access controls enable IT to set up end users and end-user groups according to features they are authorized to use, while end-point management enables IT to control access points via client and host authorization.

KEY FEATURES:

END USER

REMOTE ACCESS

- Automatic 2-Minute Setup — No client software installation is necessary
- Resizable Viewer — Adjust resolution for optimal viewing of host PC
- PocketView — Securely access a PC desktop from a Windows® Mobile, Pocket PC or Windows® CE wireless device
- Drag-and-Drop File Transfer — Transfer files and folders from one PC to another by simply dragging and dropping between screens
- Remote Printing — Print documents from host PC to local printers
- Guest Invite — Enable anyone to view or share control of a host PC
- Draw — Highlight and draw to emphasize items of interest
- Cut and Paste — Cut, copy and paste text between computers
- Chat — Communicate with a guest while sharing a host PC
- True Color — View remote desktop in true, brilliant color
- Fast Performance — Connect to a remote PC quickly and enjoy fast in-session performance
- Performance Tuning — Adjust the speed and screen quality
- Session History — Review session history to improve session performance
- Multi-Monitor Support — Use GoToMyPC Corporate with multiple monitors connected to a single PC

SECURITY

- End-to-End Advanced Encryption Standard (AES) Encryption — 128-bit keys automatically protect data stream; file transfers; chat; keyboard and mouse input
- Authentication — Dual passwords and end-to-end user authentication
- Viewer Security Timeout — Configure to time out after a set period of inactivity
- Host Security — Automatically blank host PC screen and lock host keyboard and mouse
- One-Time Passwords — Provide an enhanced level of password security
- Log-In History — View all log-in attempts and spot any unauthorized activity

ADMINISTRATION

USER CONTROL AND MANAGEMENT

- Simple User Management — Easily add and remove user accounts
- Easy Group Management — Create groups and sub-groups of users
- Real-Time User Control — View end-user connections in real time and end if necessary
- Feature-Access Control — Grant or deny access to specific features
- Admin Message Box — Create customized text message within the Administration Center for distribution to all end users

SECURITY SETTINGS

- Password-Change Enforcement — Prevent reuse of passwords and schedule password and access code expirations
- Host Security Settings — Enforce end-user security settings
- Failed Log-In Lockout — Configure lockouts for cumulative failed log-in and access code attempts
- Hours of Access — Define days and times end users can log in
- One-Time Passwords — Enforce the use of One-Time Passwords
- Two-Factor Authentication — Integrate with your existing RADIUS infrastructure
- End-Point Management — Authorize setup of host and client computers requiring a unique identifier
- Monitoring and Reporting — Quick, robust and intuitive reporting
- Account Events Report — Audit changes to accounts
- Monitoring and Reporting APIs — Perform localized and customized retrieval of current reporting data and account activity

CITRIX GOTOMYPC CORPORATE

Citrix GoToMyPC Corporate is a Web-based remote-access solution that allows easy and instant access to any PC desktop from any Internet-connected computer or wireless device. GoToMyPC Corporate reduces the costs and complexity associated with other remote-access solutions; it offers administrators the highest levels of security and control; and it immediately increases employees' productivity. A personalized online Administration Center enables an IT administrator to roll out secure remote access to the entire organization in minutes. The Administration Center is designed to be intuitive and user friendly to give an IT administrator quick and centralized access to all the features for setting up and canceling end-user privileges, controlling feature-access rights and monitoring usage in real time.

COST ADVANTAGES

- Boost productivity, build a competitive advantage and cut costs by providing remote access to the desktop for your mobile and remote staff
- Browser-based service speeds deployment by eliminating up-front costs of hardware procurement, software installation and network systems integration
- Fully managed service is less expensive to administer because providers can amortize IT cost over thousands of users
- We do all the heavy lifting associated with installing, maintaining and tuning the underlying platform
- With a browser-based solution, end users do not need to spend time configuring or learning to use VPN clients

SIMPLICITY EASY FOR IT

- Centrally manage remote access from a secure, online interface. No need to configure multiple devices or make changes to network architecture

EASY FOR END USERS

- Intuitive end-user interface provides easy-to-use remote access for employees and reduces support demands on IT

MULTI-LEVEL SECURITY

- Using 128-bit AES encryption and a highly secure data center authorized by Cybertrust, all data is compressed and protected with end-to-end encryption. No firewall changes are required
