

Updating Mac OS X EPA plug-in v3.1.4.0 in NetScaler Gateway

The following files have to be updated.

Files

```
/var/netscaler/gui/epa/scripts/mac/Citrix_Endpoint_Analysis.dmg  
/var/netscaler/gui/epa/scripts/mac/epamacversion.txt  
/netscaler/ns_gui/vpn/pluginlist.xml
```

1. 'Citrix_Endpoint_Analysis.dmg'

This is the installer file for the EPA app, place the new *Citrix_Endpoint_Analysis.dmg* under */var/netscaler/gui/epa/scripts/mac/*

2. 'epamacversion.txt'

Update this file with the version number of the app you are uploading to NetScaler (Ex: 3.1.4.0).

3. pluginlist.xml

This xml file exists **only** in NetScaler Gateway version **11.0** and later. Modify the *version* and *compatibleFrom* attributes as mentioned below.

- Sample plugin node with type "MAC-EPA" in pluginlist.xml before update

```
<plugin  
    name=""  
    type="MAC-EPA"  
    version="3.x.x.x"  
    path="/epa/scripts/mac/Citrix_Endpoint_Analysis.dmg"  
    compatibleFrom="3.y.y.y"  
    compatibleTill=""  
>
```

Update the *version* to "3.1.4.0"

```
<plugin  
    name=""  
    type="MAC-EPA"  
    version="3.1.4.0"  
    path="/epa/scripts/mac/Citrix_Endpoint_Analysis.dmg"  
    compatibleFrom="3.y.y.y"  
    compatibleTill=""  
>
```

Update the *compatibleFrom* if instructed with proper value.
